### **ARMSTRONG ARCHITECTURAL SPECIALTIES ANNOUNCES A TECTUM® PRICE INCREASE**

Geographic Coverage: Canada  
Commercial Distributors and Contractors

LANCASTER, PA – Effective Monday, February 2, 2026, Armstrong Architectural Specialties will implement a 7% price increase on all Tectum® products.

This increase is driven by changes to the exchange rate and increases in the cost of raw materials and labor.

As a reminder, all pricing for Tectum products not on our price list must be quoted through our OneQuote tool. Please note the escalation table on all Tectum quotations will apply.

For longer-term future quotes, we suggest the following pricing for 2026 and 2027:

- Additional 5% increase for quotes issued on or after August 3, 2026
- Another additional 5% increase for quotes on or after February 1, 2027

This Pricing Bulletin and the above guidance are based on currently available information and reflect conditions at this time. Consistent with past practices, we will provide updated pricing information in the form of list pricing, bulletins or other notifications, as appropriate, as additional information becomes available. As always, you remain free to quote, price, and contract at pricing of your choosing at your discretion. Please feel free to contact your local area manager with any questions or requests for assistance.

As always, we appreciate and thank you for your business.

Mike Winters  
VP, Architectural Specialties
