

1. Product Description

AMICO's patented Secura Clip™ fasteners have a recessed center hole allowing a Tek screw to seat at the surface of the AMICO Security Mesh and not create humps and bumps alerting intruders to the penetration barrier. Secura Clip™ fasteners provide over 68% more holding strength than standard screws alone. Galvanized finish also available.

2. References

ASTM D3953-13 Standard Specification for Strapping, Flat Steels and Seals

ASTM B695-21 Standard Specification for Coatings of Zinc Mechanically Deposited on Iron and Steel

3. Technical Specifications

a. Material

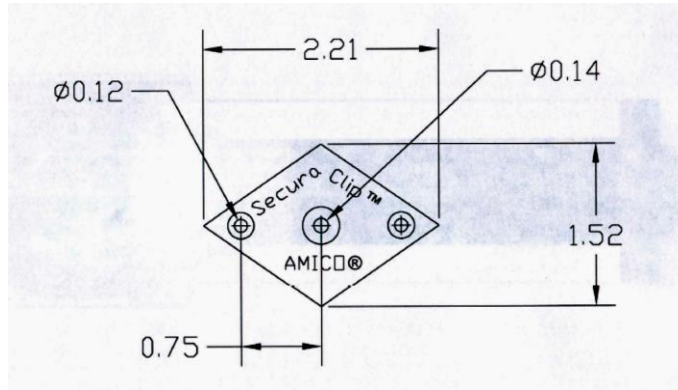

Cold rolled, medium carbon steel with coating of zinc mechanically deposited on steel.

b. Mechanical properties of steel

Thickness (in)	Shear strength (psi)	Tensile strength (psi)
0.025	117,000	156,000

4. Dimensions
